LABOUR MARKET DEFINITIONS

The following definitions are of relevance and significance to the labour market.

Employed

Are persons aged between 15-64 years, during the reference week; did any work for at least one hour, or had a job or a business but were not at work (temporarily absent).

Labour force

Comprises all persons who are employed plus all persons who are unemployed.

Labour force participation rate

The labour force participation rate is the percentage of working-age persons in an economy who:

- Are employed
- Are unemployed but looking for a job

Not economically active population

Persons aged 15-64 years who are neither employed nor unemployed in the reference week.

Unemployment rate

It is the proportion of the labour force that is unemployed.

Long term unemployment

Persons in long-term unemployment are those individuals among the unemployed who are without work and trying to find a job or start a business for one year or more.

Underutilised labour

Comprises three groups as follows: persons who are underemployed, people who are unemployed and people who are discouraged.

Underemployment

Are employed persons who were willing and available to work additional hours, whose total number of hours actually worked during the reference period was below 35 hours per week.

Population of working age

Comprises all persons aged between 15-64

Unemployed

Persons aged 15-64 years who

- Were not employed in the reference week and;
- Actively looked for work or tried to start a business in the four weeks preceding the survey interview and;
- Were available for work, i.e. would have been able to start work or business in the reference week or;
- Had not actively looked for work in the past four weeks but had a job or business to start at a definite date in the future and were available.

Not Economically Active Population

The not economically active population refers to persons aged 15-64 years who are neither employed nor unemployed in the reference week. People are not economically active for different reasons, such as; they are students, homemakers, suffering from illness/disability, too old/young to work, discouraged or for other reasons.

Discouraged work seeker

A person who was not employed during the reference period, wanted work, was available to work/ to start a business but did not take active steps to find work during the last four weeks, provided that the main reason given for not seeking work was any of the following: no jobs available in the area; unable to find work requiring his/her skills; lost hope of finding any kind of work. Discouraged work seekers are either too young or too old, they have lost hope of finding a job, and they are no longer searching for work.

OVERVIEW OF KZN LABOUR MARKET

The population of working age is the sum of the labour force plus the not economically active population or the total number of residents between the age of 15 and 64 at any particular date or period.

The table below (table 1) shows that the population of working age increased from 6,340,000 in Q1:2009 to 6,930,000 in Q1:2013, i.e. by **590,000** or 9.31% over the period. The labour force on the other hand decreased from 3,248,000 in Q1:2009 to 3,192,000 in Q1:2013, i.e. by **-56,000** or by -1.74% over the period. The number of people who are not economically active therefore increased from 3,093,000 in Q1:2009 to 3,738,000 in Q1:2013, i.e. by **645,000** or by 20.85%. The total increase in the number of not economically active people is equal to the increase in the population of working age plus the decrease in the labour force.

Table 1 Relationship between the population of working age, the labour force and the not economically active population in KZN

	Population of working age (15–64 years)	Labour Force	Not Economically Active
Q1 2009	6,340,000	3,248,000	3,093,000
Q2 2009	6,362,000	3,043,000	3,319,000
Q3 2009	6,384,000	3,105,000	3,279,000
Q4 2009	6,405,000	3,068,000	3,337,000
Q1 2010	6,426,000	3,084,000	3,342,000
Q2 2010	6,439,000	3,081,000	3,358,000
Q3 2010	6,664,000	2,990,000	3,675,000
Q4 2010	6,692,000	3,040,000	3,652,000
Q1 2011	6,720,000	3,049,000	3,671,000
Q2 2011	6,748,000	3,137,000	3,610,000
Q3 2011	6,776,000	3,103,000	3,673,000
Q4 2011	6,802,000	3,176,000	3,626,000
Q1 2012	6,828,000	3,168,000	3,660,000
Q2 2012	6,855,000	3,143,000	3,712,000
Q3 2012	6,881,000	3,218,000	3,663,000
Q4 2012	6,905,000	3,215,000	3,690,000
Q1 2013	6,930,000	3,192,000	3,738,000
	=	+	+
Overall	590,000	-56,000	645,000

(Source: Statistics South Africa)

The table (table 1) indicates or suggests that there's been a decrease in the number of people who are ready, able and willing to work over the period in the province.

This below graph (graph 1) is a graphical depiction of table 1, i.e. the population of working age, the labour force and the not economically active population. The graph highlights the point where the not economically active population started exceeding the labour force. This occurred at the beginning of the world financial crisis and at the time when the South African economy went into a recession. However the trend since then has not reversed even though the world and the SA economy has been "recovering" and/or "growing". It therefore seems fairly evident that the provincial labour market has not adjusted to its pre-recession structure and performance suggesting that the labour market has experienced a permanent structural adjustment.

Graph 1: Population of working age Dynamics in KZN

The table below indicates that the Labour Force is the sum of the employed and the unemployed. The table also indicates the growing number of discouraged work seekers in the province. The number of employed people in the province increased by **27 000** people during the 1st quarter of 2013. However, the total increase in the number of employed people for the entire period is a mere **6 000**. The number of unemployed people decreased over the period, decreasing by about **-61 000** people or by -8.32%.

On the other hand, the number of discouraged work seekers increased from 271 000 in Q1:2009 to 574 000 in Q1:2013, i.e. by **303 000** or by 111.81% over the period.

The decrease in the number of unemployed people in the province is due to the decrease in population of working age, while very few jobs opportunities were created to absorb the increasing population of working age.

Table 2: The relationship between the labour force, the employed, the unemployed and the discouraged work seekers

	<u>Labour Force</u>	<u>Employed</u>	<u>Unemployed</u>	<u>Discouraged Work Seekers</u>
Q1 2009	3,248,000	2,514,000	733,000	271,000
Q2 2009	3,043,000	2,457,000	586,000	448,000
Q3 2009	3,105,000	2,526,000	579,000	495,000
Q4 2009	3,068,000	2,476,000	592,000	467,000
Q1 2010	3,084,000	2,488,000	596,000	503,000
Q2 2010	3,081,000	2,436,000	645,000	504,000
Q3 2010	2,990,000	2,401,000	588,000	563,000
Q4 2010	3,040,000	2,439,000	601,000	540,000
Q1 2011	3,049,000	2,429,000	620,000	592,000
Q2 2011	3,137,000	2,500,000	638,000	604,000
Q3 2011	3,103,000	2,510,000	593,000	549,000
Q4 2011	3,176,000	2,562,000	614,000	547,000
Q1 2012	3,168,000	2,519,000	649,000	579,000
Q2 2012	3,143,000	2,520,000	623,000	585,000
Q3 2012	3,218,000	2,533,000	685,000	570,000
Q4 2012	3,215,000	2,493,000	722,000	589,000
Q1 2013	3,912,000	2,520,000	672,000	574,000
Overall	664,000	6,000	-61,000	303,000

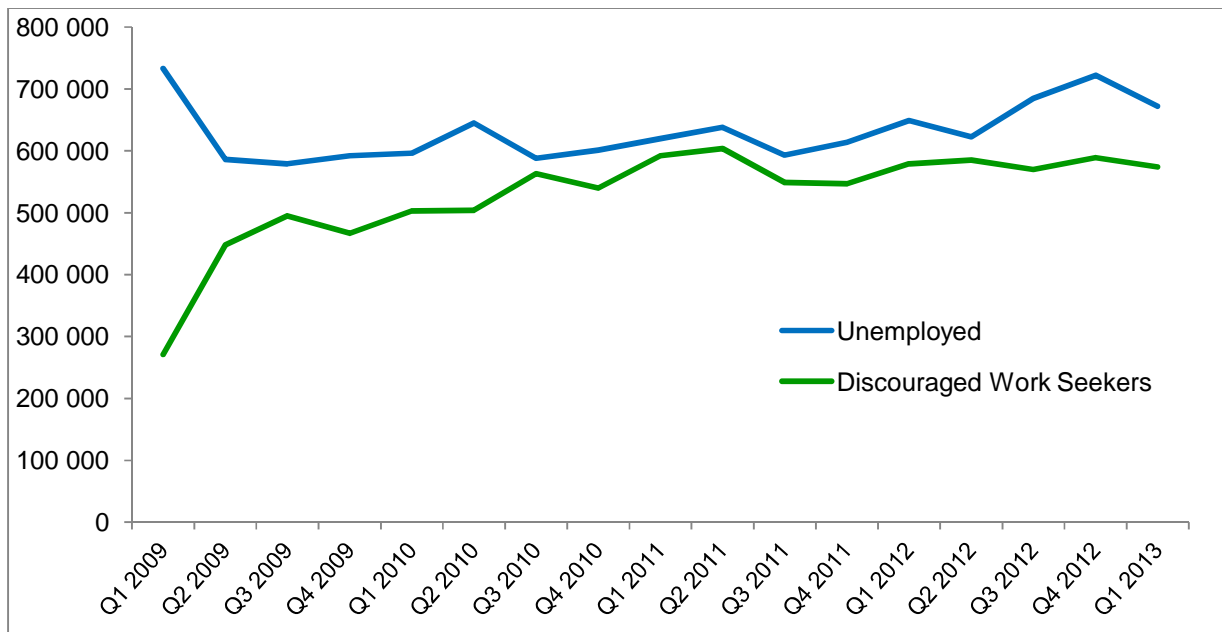

(Source: Statistics South Africa)

The below graph (graph 2) display some very important and relevant characteristics of the KZN labour force. The graph indicates that the labour force and the number of people employed in the province follows very similar trends over the period. The graph also indicates that the gap between the number of people unemployed and discouraged have narrowed over the period. More people are also leaving the labour force and becoming economically inactive.

Graph 2.2: Labour Force Dynamics in KZN

THE CHARACTERISTICS OF THE NOT ECONOMIC ACTIVE POPULATION FOR KZN

The characteristics of the number of people not economically active in the province are not supplied by Stats SA and thus it needs to be derived or estimated. To derive or estimate the number of people not economically active in KZN the following equation is used.

$$\frac{\text{KZN Not economic active population}(t)}{\text{SA Not economic active population}(t)} = \text{ratio}t$$

This ratio will then be applied to the national characteristics to derive or estimate the KZN characteristics. The characteristics of the not economically active KZN population for the 1st quarter of 2013 are derived or estimated as follows:

- **Students** are estimated at **1,513,172**
- **Homemakers** are estimated at **727,836**
- **Illness/disability** are estimated at **395,779**
- **Too old/young to work** are estimated at **308,907**
- **Discouraged for** are estimated at **579,979**
- **Other** are estimated at **212,327**

The characteristics of the not economically active KZN population for the 1st quarter of 2013 are also displayed in the following table.

Table 3: Characteristics of the not economically active KZN population

1 st Quarter 2013	Not economically active
Students	1,513,172
Homemakers	727,836
Illness/disability	395,779
Too old/young to work	308,907
Discouraged	579,979
Other	212,327
Total	3,738,000

(Stats SA, Own calculations)

The statistics indicated that more than 40% of the people that were not economically active in KZN during the 1st quarter of 2013 were students. Homemakers accounted for about 19.5% and discouraged work seekers for about 15.5%.

CHARACTERISTICS OF THE NUMBER OF UNEMPLOYED PEOPLE IN KZN

Methodology

The characteristics of the number of people unemployed in the province are not supplied by Stats SA and thus it needs to be derived or estimated. To derive or estimate the number of people unemployed in KZN the following equation is used.

$$\frac{KZN\ Unemployed\ (t)}{SA\ Unemployed\ (t)} = \text{ratio}$$

This ratio will then be applied to the national characteristics to derive or estimate the KZN characteristics. The characteristics of the unemployed KZN population for the 1st quarter of 2013 are derived or estimated as follows:

Job losers are unemployed people who had been working during the 5 years prior to becoming unemployed and: they had lost their job; or they have been laid off; or the business where they previously worked had been sold or closed down. The number of people that have lost their jobs in KZN for the period is estimated to be **204 331**.

Job leavers are those amongst the unemployed who had been working during the 5 years prior to becoming unemployed and had stopped working at their last job for any of the following:

- Caring for own children/relatives;
- Pregnancy;
- Other family/ community responsibilities;
- Going to school;

- Changed residence;
- Retired or;
- Other reasons

The number of people that have left their jobs in KZN for the period is estimated to be **41 771**.

New entrants refer to those people who were unemployed during the reference period that had never worked before. New entrants for KZN for the period are estimated to be **294 885**.

Re entrants to the labour force are unemployed people who worked before whose main activity before looking for work was either managing a home or going to school. For KZN, re-entrants for the period are estimated at **27 312**.

Other refers to those people who were not included in Job losers, Job leavers, new entrants, or Re entrants. For KZN, the population that falls under the category of other for the period is estimated at **103 699**.

The characteristics of the not economically active KZN population for the 1st quarter of 2013 are also displayed in the following table.

Table 4: Characteristics of the Number of Unemployed People in KZN

1 st Quarter 2013	Number Of Unemployed People
Job losers	204,331
Job leavers	41,771
New entrants	294,885
Re entrants	27,312
Other	103,699
Total	671,998

(Stats SA, Own calculations)

The statistics indicate that 43.88% of the people that were unemployed in KZN during the 1st Quarter of 2013 were new entrants. Job losers accounted for 30.41% and other for about 15.43%.

The long-term unemployment (longer than 1 year) for KZN is estimated at **438 603** during the 1st Quarter of 2013, whilst the short-term unemployment (less than 1 year) for KZN is estimated at **233 542** during the 1st Quarter of 2013. The majority of people unemployed in the province seem to be unemployed for longer than 1 year making them structurally or permanently unemployed.

Table 5 indicates the occupations where the job losses occurred. Table 5 indicates that the majority of job losses occurred in the elementary and craft and related trade occupation whilst the skilled agriculture occupation shed the least amount of jobs.

Table 5: Characteristics of those who have worked in the past five years for KZN

1 st Quarter 2013	Number of those who have worked in the past five years
Manager	7,011
Professional	3,797
Technician	14,606
Clerk	33,739
Sales and services	43,817
Skilled agriculture	1,168
Craft and related trade	44,839
Plant and machine operator	23,077
Elementary	79,600
Domestic worker	21,762

(Stats SA, Own calculations)

Table 6 displays the industries where the job losses occurred. The transport industry shed the most jobs, whilst the Utility industry shed the least amount of jobs.

Table 6: Characteristics of the unemployed in different industries for KZN

1st Quarter of 2013	Number of job losses per industry
Agriculture	13,583
Mining	5,696
Manufacturing	33,593
Utilities	3,213
Construction	42,502
Transport	66,017
Trade	12,415
Finance	35,784
Community and social services	30,087
Private households	30,526

(Stats SA, Own calculations)
